SUMMARY

Performance-driven Computational Linguist with 2+ years of experience designing multilingual NLU/NLG pipelines and rule-based NLP systems. Expert in managing large-scale language data and developing human-in-the-loop (HITL) annotation workflows for Indian languages. Proven track record of bridging linguistic complexity with scalable digital experiences through Python driven automation and data-centric design.

SKILLS

- Python (NLTK, Pandas, NumPy), Git, Scripting for NLP
- Basic SQL (Data Extraction), Web APIs (Integration), Qlik Sense (Analytics)
- Intent/Entity Recognition (NLU), NLG, Morphological Analysis, Phonetic Transcription
- Figma, JIRA, Rev, Wavesurfer
- Hindi (Native), English (Proficient)

EXPERIENCE

PhonePe – Indus Appstore

Localization Executive – Hindi

Oct 2023 – Present

- Engineered a rule-based Transliteration Tool using Python, automating manual content preparation and reducing localization cycles by 60%
- Utilized Qlik Sense analytics to strategically curate regional homepage collections, resulting in an 87% increase in app installs and engagement.
- Authored 5+ Standard Operating Procedures (SOPs) to streamline cross-functional collaboration between Product, Content, and Engineering teams.

Lysto, Bangalore

Technical Content Developer

Feb 2023 – Sep 2023

- Designed and optimized conversational support flows by capturing user intent and mapping linguistic variations to improve UX.
- Executed SEO keyword strategies derived from user-generated language data to boost platform discoverability.

PROJECTS & PORTFOLIO

Language Data Annotation | IIT Madras | Junior Executive | Oct 2025 - Present

- Collaborating on a Govt. of India funded initiative to enhance educational content accessibility through large-scale data collection.
- Managing human-in-the-loop (HITL) data annotation, translation, and quality analysis of multimodal educational content (Video/Text).

Kashibot: Conversational Design | BHU | Project Lead | Aug 2023

- Architected multilingual intent mapping and end-to-end conversational workflows for a tourist agent (Hindi, English, Telugu).
- Applied NLP principles (NLU, NLG) and validated conversational architecture via user surveys.

Respin Transcription Project | IISc | Mar 2023

- Conducted phonetic transcription of Hindi audio data across Agriculture and Finance domains using Rev and Wavesurfer.

Hindi Morphological Generator | BHU | Developer | Feb 2023 – March 2023

- Developed a rule-based Morphological Analyzer in Python to parse grammatical features (gender, number, case), aiding language technology research.

CERTIFICATIONS

- [Product Management: Building a Product Strategy – PMI® REP \(May 2025\)](#)
- [Conversational Design – Cognigy Academy \(May 2023\)](#)
- [Python for Data Science – IBM \(April 2023\)](#)

EDUCATION

Banaras Hindu University (BHU)

MA, Linguistics – 2021–2023 | CGPA: 8

BA, English Hons. – 2018–2021 | CGPA: 8.5
